- Early-stage startup environment
- International team from multiple continents
- Significant growth potential
- Equity opportunities available

Company Overview - Stormbit/Quantum3labs

Stormbit is an independent fintech protocol building essential infrastructure for global lending markets. We're strategically aligned with ecosystem partners in web3 and are developing partnerships with government institutions to explore AI-driven lending solutions. Our protocol connects traditional finance with modern financial technology, focusing on bridging the gap between Web3 DeFi yields (0.75-7%) and traditional lending markets (up to 23% in emerging economies).

As an early-stage project with a clear roadmap and strong strategic partnerships, we offer team members the opportunity to:

- Work directly with core protocol development
- Shape fundamental financial infrastructure
- Collaborate with international partners including government institutions
- Be part of a multicultural team solving real financial inefficiencies

Status:

- Early stage with active development
- Strategic alignment with major blockchain platforms
- Government institution partnerships in progress
- Building core protocol infrastructure
